The end use may be drinking, industrial water supply, irrigation, river flow maintenance, water recreation or many other uses, including being safely returned to the environment. Water treatment removes contaminants and undesirable components, or reduces their concentration so ... 4 Process Involved in Scale up Criteria | Microbial ... In scale up of bioreactors mixing time is often used as criteria. Mixing time (t_{mix}), defined as the period of time required for the homogeneous distribution of a small volume of pulsating material in the bulk of the liquid, was used for scale up to adjust proper mixing conditions in large vessels. However, limitation of using t_{mix} as scale up criteria is that it increases markedly with the ... How-To: Download Author Disabled Presentations from ...
