[M J Wilson; Zhenli He; Xiaoe Yang] -- The red soils of China are highly weathered, inherently infertile and very susceptible to erosion. However, they represent China's last available soil resource that could be brought into agricultural ... The Red Soils of China | Request PDF - ResearchGate In China, utilization of red soils for crop production by farmers depends not only upon the employment of such practices but also upon socio-economic factors and the availability of adequate ... The Red Soils of China: Their Nature, Management and ... The red soils of China are typical in their chemical, physical and mineralogical characteristics of red soils in other tropical and sub-tropical areas of the world, particularly in South America, Africa and south-east Asia. For the most part, these soils are highly weathered and inherently infertile. They are acidic, nutrient deficient, poor in organic matter and have a low water-holding and ...
